Big Fight Program Being Arranged

Jimmy Toller, our local fight promoter, has just completed making arrangements for an excellent boxing card here around the latter part of April or the first week in May, and feels confident that Jack Dempsey and Max Schmelling, world renowned boxers will appear on the card. Besides having the Ex-World Champions on the card he is making arrangements with "Lefty" Boshko, of Endling to fight one of the three noted fighters: Louis Lavy, the Dominican Amateur Champion; Otto Berg, Light Heavyweight Champion of Northern Alberta, and Emil Lust, welterweight Champion of Western Canada. A match with Boshko and one of these three noted boxers should prove a perfect battle. Jimmy advises also he is planning on matching Jack Young, champion of Edmonton with Pete Holm, Lacombe; Frank Walcut, Lacombe; Young Corbett, Calgary; Curly Archibald with Baden Whitehead, Don Wells and Bill McKinley and two or three other outstanding bouts. With a card like this, fight fans will agree that such an all-headliner programme will give the fans more than their money's worth.

Although it has not been definitely decided who will fight against Boshko in the main championship bout, fans are assured that a real, even match will be arranged. As all boxing enthusiasts are aware, Boshko is a real fighter, and in his many battles he has never been defeated. During the past week other prospective fighters have been lined up with the idea of drawing a real top-notch bout to meet Boshko. Word was received from Paddy O'Brien, who it will be remembered, put up such a wonderful fight against Boshko here last fall. O'Brien, it will be remembered, floored Boshko for a count of nine. Another prospective combatant heard from in Athabasca. It was rumored last fall that Athabasca Kid had died from pneumonia, but a letter received from his manager, emphatically denies this report. In fact his manager informs us that the Kid is very much alive, and is prepared and willing to meet all comers. O'Brien has also been doing a lot of fighting up north and is in perfect fighting form. Either one of these men would be a worthy opponent for Boshko. Boshko has fought several fights this winter and is reported to be in top form.

Pete Holm and Frank Walcut, who have been training together for the past two months are in A1 condition. Harry Murray, Pete's general manager informs us that his man is going better now than ever before, and by the time of the scheduled fight will be able to step into the ring in absolutely perfect condition. Frank Walcut, is doing plenty of road work, along with regular gymnasium training. He reports himself in the pink of condition and is ready for the fray. Every one of the above fighters are real exponents of the "art" and will provide plenty of action for the fans.

Just keep your eyes open for announcement of the date of this monster tournament and be prepared to come and see the show. The fight will be in action. Fans who witnessed the tournament last fall say it was the best ever held. The tournament to come off next month promises to put it in the shade. Watch The Western Globe for further announcements.

NEW ZEALAND WHEAT FARMERS SITTING PRETTY

New Zealand wheat farmers are obtaining 43 to 45 (11.06 to 11.12) for their wheat this season. They are consequently on easy street compared with their brethren in wheat exporting countries. The odd feature, too, is that New Zealand will export wheat this year, having produced a surplus. The government, however, established a wheat board, with a monopoly of the sale and purchase of milling wheat. Production on the island in 1932 was 19,290,000 bushels. Domestic requirements are about 80,000,000. The bread consumers are not any too well pleased at the high price of wheat but their protests have availed nothing.

MALONEY TO BE RELEASED

John James Maloney, one time Imperial Wizard of the Alberta Boreal Ku Klux Klan, will be released from Fort Saskatchewan jail on Thursday, March 23, according to information obtained at Edmonton police headquarters. Maloney paid the \$100 fine and costs in full, and was paid for the damage to the Mayfair Country Club property.

Brownlee Gets One Farmer's Goat

A U.F.A. Legislator declared that Brownlee has "Got His Goat." The onslaught was delivered by Milton C. McKee, U.F.A. member for Lac Ste. Anne, who had some harsh things to say about the premier's attitude in his house on Monday night. Opening his verbal fire upon the premier, Mr. McKee stated that the last 10 or 15 minutes of the premier's address at the afternoon sitting, had "got his goat." When a speaker could talk so easily about optimism, it was much to great for even the member's imagination.

"More and more people are going on the bread line, children are undernourished, yet we have been hearing for a long time about prosperity beaming from the corner," said Mr. McKee. The premier's reference to conciliation brought a deal with debt adjustment drew a protest from Mr. McKee.

"It is like adding insult to injury." Speaking in the legislature on Wednesday afternoon, A. P. Mitchell, Liberal member for Leduc, said: "The member for Lac Ste. Anne gave us a sort of surprise last night. It seems so comfortable to the members on this side to hear at least one member on the government side speak his mind, independent of politics. I am sure that a few others feel the same way but they have not the courage of their convictions and therefore keep quiet."

D. M. Duggan, Conservative leader, on Monday proposed a federal loan council to guarantee refunding issues of western provinces.

Declaring that the provincial telephone system should be put upon a sound financial basis, Mr. Duggan charged that the rural extensions policy and the rate base had been influenced by political considerations instead of sound economic principles. Naming of a house committee of southern Alberta members to study and investigate the Lethbridge Northern project and report at the next session, was called for by the Tory Chief.

R. Falconer, Liberal for Athabasca, advocated tax revision and a large share of provincial revenue for municipalities, when continuing the debate upon the budget in the legislature on Monday. He also showed support for smaller farmers and more farmers in this district. F. C. Moyer, Independent from Drumheller, demanded that the Government protect the coal mining revenue, stating that many were hard pressed.

Pete Holm and Frank Walcut, who have been training together for the past two months are in A1 condition. Harry Murray, Pete's general manager informs us that his man is going better now than ever before, and by the time of the scheduled fight will be able to step into the ring in absolutely perfect condition. Frank Walcut, is doing plenty of road work, along with regular gymnasium training. He reports himself in the pink of condition and is ready for the fray. Every one of the above fighters are real exponents of the "art" and will provide plenty of action for the fans.

GOVERNMENT RESIGNATION DEMANDED

Charging grave irregularities in the provincial highways department of such a sweeping nature that they amounted to "a scandal and a crime" and declaring that of forty-two contracts let in the past two years for highway construction only nine have been let by tender, and that in the remaining forty gross overpayments had been made in every instance, W. R. Howson, Liberal leader, caused a sensation in the legislature on Wednesday last when he charged deliberate falsification of engineers' records to cover up the irregularities and called upon "the whole government to resign."

Mining no words in his charges, and quoting from the official replies tabled in the legislature to questions asked by him earlier in the session as his authority, the Liberal leader threw the front benches of the government supporters into a veritable uproar and left the rank and file of the U.F.A. members sitting stunned and speechless in their seats.

In bringing his charges of dishonesty against the administration of the department, Mr. Howson said he did so after consideration and in full realization of his position as the leader of a party and of his duty to that party both within and without the house.

His attack was sweeping and far-reaching. Overpayments of a year's age of loose records, overcharges in salaries, kickbacks, overcharges in clearing and grubbing operations, were charged.

The new season's wall papers are in—Lacombe Furniture Store.

A Letter From The Old Chief

A letter was received this week by The Western Globe from Mr. Archie MacDonald, for several years Chief of Police in Lacombe, and now living at Bayview, North Unit, Scotland. His close friends in Lacombe and the district will be sorry to learn that he will not be back on his old job here, but has decided to stay in Scotland. Archie's term here as Chief of Police, he made many friends by his genial disposition and his careful attention to duty. Archie's decision not to return to his old position is regrettable. In his letter he reports that things in the part of Scotland where he is living are very good. He says there is plenty of work there for those who really want to work, and that he has had no difficulty whatsoever in keeping busy. He says he has been working steadily ever since he landed there. He says he will not likely be back in Canada for a couple of years, but that when he does return, that he will surely look up his many old friends in Lacombe.

In his letter he asked us to say a word of appreciation to both the old council of Lacombe and to the High School education there, later taking a course in dairying at St. Lawrence college in New York state. During the war he joined the Canadian Air Force, but did not see active service. He returned to Alberta in 1921 was married to Miss Jessie Glass, daughter of Mrs. H. A. Day and the late Andrew Glass, of Edmonton, Ontario. Of this marriage there are four children, Evelyn, aged 10, Glen, aged 9, William, aged 7, and a baby, aged 5. Besides his wife and family he leaves to run his loss, his father and mother, Mr. and Mrs. A. C. Cannon, of Edmonton, Ont., and three sisters, Miss Jean, of Vancouver; Miss Dora, of Edmonton, and Mrs. Wm. Broderick, of Leduc, Alta.

The funeral service at St. Andrew's United Church was conducted by the Rev. Mr. Davies, of Ponoka, in the absence of the regular minister, on Monday, March 20, 1933. Many beautiful floral tributes were received in token of the esteem in which deceased was held in the community.

Goets To Jail For Attempted Murder

Lethbridge, March 17. Found guilty by a jury of two counts; attempted murder of J. W. Boulton and the stealing of an automobile, the property of Boulton, on the night of December 12, 1932, near Turin, John Mackin, of Lethbridge, was today sentenced to three years in the penitentiary on each charge, sentences to run concurrently, and a recommendation of the court, by Chief Justice Simons.

In sentencing the accused, the chief justice commented that while some former Austrians are making good Canadian citizens, many carry firearms and constitute a menace to the public. Foreigners coming to this country, he said, must abide by Canadian laws.

The entire day was taken up in the hearing of evidence relative to the shooting of the night of December 12, when Mackin hired Boulton, a taxi driver, to drive him into the country.

Dr. Bigelow, Lethbridge, gave medical testimony concerning the nature of the wound, above the right ear, two inches in length, from which the victim died profusely. Boulton related conversations with the accused in which the terms of the drive were agreed upon. After stopping for liquor 11 miles from Lethbridge, Mackin asked to be driven to Turin, where they stopped at the house of Tom Kindrat. Leaving the Kindrat home with Kindrat in the front seat beside him, Boulton said another call was made and the return he was suddenly ordered to stop. He was fired upon, left the car, and turning saw it drive off.

Kindrat was told not to say anything about the occurrence.

Defence pleaded that accused was crazed through drink.

TEACHERS' MINIMUM SALARY

The teachers of Alberta recognize as readily as anyone the fact that they must share in the general deflation of salaries. But the readiness to accept lower pay during a time of stress does not conflict with their objection to the proposal of the minister of education to reduce the legal minimum. An amendment to school act now before the legislature would lower the minimum salary from \$400 a month or \$480 a year to fifty a month or \$600 a year.

The act as it was passed in 1931 permitted a lower rate that \$840 a year if the inspector, after an inspection, certified that in his opinion it would be a hardship on the district to pay such a salary.

There is good ground for the teachers' present contention that the act as it stands provides all the necessary machinery for reduction of pay, and that the reduction of individual school districts and the proposed amendment would mean merely a general lowering of scale even in districts well able to pay the existing legal minimum. The net result of the amendment probably would be a scarcity of teachers when better times return.

Kitchen Chairs, \$1.00 to \$1.60; Stool Beds, walnut finish, \$7.00 up; Pelt Mattresses \$4.75 up at Lacombe Furniture Store.

Death of Gilbert Cannon

On Saturday, March 18th, at the Ponoka Hospital, there occurred the death of Gilbert Allan Cannon, a well-known young farmer of Lacombe district. For some time previous to his death, Mr. Cannon had been very ill and suffering from severe and continuous headaches. In March, he was taken to a specialist at the Ponoka Hospital for diagnosis and was found to be suffering from tubercular meningitis. From that time on he sank rapidly and died late Saturday afternoon, March 18th. His parents, Mr. and Mrs. A. C. Cannon, from Edmonton, Ontario and his sisters, Miss Jean of Vancouver and Mrs. Wm. Broderick, of Leduc, Alta., were summoned to his bedside during his illness.

The late Mr. Cannon was born in Park City, Utah, on March 18, 1884, and came to Alberta as a young child with his parents. Later they moved to Edmonton, Ont., where he received his public school education. His parents then moved to a farm near Lacombe, Alta., and he completed his High School education there, later taking a course in dairying at St. Lawrence college in New York state. During the war he joined the Canadian Air Force, but did not see active service. He returned to Alberta in 1921 was married to Miss Jessie Glass, daughter of Mrs. H. A. Day and the late Andrew Glass, of Edmonton, Ontario. Of this marriage there are four children, Evelyn, aged 10, Glen, aged 9, William, aged 7, and a baby, aged 5. Besides his wife and family he leaves to run his loss, his father and mother, Mr. and Mrs. A. C. Cannon, of Edmonton, Ont., and three sisters, Miss Jean, of Vancouver; Miss Dora, of Edmonton, and Mrs. Wm. Broderick, of Leduc, Alta.

The funeral service at St. Andrew's United Church was conducted by the Rev. Mr. Davies, of Ponoka, in the absence of the regular minister, on Monday, March 20, 1933. Many beautiful floral tributes were received in token of the esteem in which deceased was held in the community.

Auto Licenses Down \$5.00

"The Early Bird" Loses Out

Edmonton, March 20.—Reduction of motor car licenses in this province on a flat \$5.00 basis to take effect Monday, April 3, was announced in the legislature Monday afternoon by Premier Brownlee.

The cut will mean loss of \$160,000 in provincial revenue from car licenses this year, but this will be partly offset by an increase of the gasoline tax from 5 to 6 cents per gallon.

The premier stated the government has decided to make the reduction in car licenses as a special emergency action which, however, was not to be taken as indicating the policy in this respect in future years.

As in former years, there will be the usual half-yearly rate on car licenses put into effect on Aug. 1. The effect of the present announcement is that for persons taking out licenses between April 3 and Aug. 1, the license will cost \$5.00 less than it would have on Jan. 1 or since that time.

CANADA'S NEW CHIEF JUSTICE

The long and distinguished service that the Right Honourable Lyman Duff has given to the supreme court of Canada marked him out clearly for the appointment as its head. He is the first westerner to hold the chief justiceship. After graduating from the University of Toronto and teaching mathematics for a while in Ontario, he started the practice of law at Victoria in 1895. He soon became a leading figure at the bar and in the political life of B.C. The fact that he was a Liberal about whom, as judicial selections have in the past been confined too largely to those who belonged to the party in power at the time.

Before he joined the court at Ottawa in 1906 the new chief justice had been a judge in his own province for two years. What had brought him most prominently before the public of late has been his work as chairman of the commission to investigate the railway situation, the findings of which were incorporated in the legislation that has now reached its final stage in parliament.

Alberta Now Has Cattle Trade Mark

For the first time in history of Canada live cattle will this spring go to market with a registered trade mark stamped on each animal. The trade mark will be "RL" in a six-pointed star red plastic stamp and for Red Label. The Red Label Beef Association of Southern Alberta, through long effort, and with the help of Hon. George Hoadley, Alberta minister of Agriculture, has secured a federal government trademark for Red Label beef animals. A certain standard is being set before the trademark may be placed on any of the animals, and only those animals in any lot which come up to the "RL" standard will get the mark. "The Red Label Association is the only organization in Canada which is in a position to breed, feed and market the kind of cattle Old Country consumers want," said W. R. Brown, of Brown Abattoir Co., Manchester, England, cattle importer, a recent visitor to Alberta.

What We Know About Earthquakes

Earthquakes have been known since the dawn of history, yet it is only since the middle of the nineteenth century that any serious effort has been made to secure exact knowledge. Even today science must confess itself ignorant of the real cause of which disturbance of the earth's surface is but an effect. Probably earthquakes were actually more severe in the early dawn of time although, with the earth's population increasing year by year, the resulting resulting continue to grow in extent.

There are, according to the scientists, two kinds of earthquakes; those deep in the heart of the earth, and those near the surface. The latter are caused directly or indirectly by the former. The scientists believe, are the result of actual chemical changes resulting in a change in the volume of the compounds. This expansion or contraction adds to or lessens the pressure on the earth's crust and of course these parts which are "weak spots," are composed of broken strata, or have other defects, react most readily.

Broadly speaking, earthquakes are most frequent near the steep slopes of the Rocky Mountains, Japan and California suffer because they are on the edge of such activities. Just off the coast of Japan, for instance, there is a submarine chasm about five miles deep. Great masses of rock, whose section of slope somewhat like a wedge, are water seep into the "faults," and slide to the bottom in response to any stimulus, such as might be imparted by a subterranean disturbance. This part of the earth's surface seems to be almost continuously on the move. Between 1885 and 1922, more than 3,800 quakes were recorded in Japan, or an average of more than a thousand a year. Some of the under-ocean rock slips involve such huge masses, that great tidal waves result and the ocean sometimes is kept in oscillation for 24 hours at a time. The California quakes are said to be caused by similar slides of rock on settling of faults and in the steep sides of the ocean bed near the coast.

Although science cannot tell exactly what is going on in the earth's centre, its studies have changed the popular conceptions considerably during the past two hundred years or so. Back in 1765 when Lisbon was practically destroyed and about 30,000 persons killed in one of history's great quakes, many of the English clergy held the view that the visitation was because the city's inhabitants were Catholics; while the survivors in the city itself attributed their misfortunes to the fact that they had tolerated a few Protestant heretics in their midst. Incidentally the Lisbon earthquake was felt from Scotland to Asia Minor. The most destructive earthquake on record, of course, was in Japan on September 1, 1923. The casualty list was officially set at 99,331 dead, 103,783 wounded and 43,476 missing. The total property loss was due to the quake and the subsequent fires was close to five billions of dollars.

THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary
St. Cyprian's Church, Lacombe
Rector: Rev. T. H. Chapman
Organist: Miss Kathleen C. Walters, L.A.B.
Friday, March 24th
The regular Sunday morning service of the Junior League will be held at the home of Mrs. F. V. Parsons, Suite, at 3:45 p.m.
March 26th, 4th Sunday in Lent
10:00 a.m. Sunday School.
11:00 a.m. Morning Prayer.
7:30 p.m. Evening Prayer.
Please do not overlook the Special Lenten Service on Wednesday.

Redistribution of Alberta Ridings

The 1931 census showed that Alberta had become entitled to one more federal seat and that it would be located north of Red Deer. Proposed, according to Ottawa correspondence, is to take a large stretch of territory in the western part of the province, stretching between the Peace River and Red Deer constituencies, and to christen it "Jasper". Though the exact boundaries are not stated, it will have to include a large part of the present Peace River riding, the southern limit of which is west of Lacombe and to which the census gave a population of 76,380. This figure is far in excess of the unit of population for redistribution purposes, the number of people there having nearly doubled in ten years.

The population of East Edmonton increased in the decade from 36,263 to 48,985 and that of West Edmonton from 38,748 to 51,584. These gains it was thought, were sufficient to permit of excluding from the constituencies most of their rural portions and making them more completely urban in their character. It is surprising, therefore, to learn that the intention is to have East Edmonton remain unchanged and that, while the Morinville and Legal districts are to be detached from West Edmonton and added to Jasper, the Fort Saskatchewan constituency is to take their place.

The town of Fort Saskatchewan is now in Vegreville and, as it lies to the east of the city, the arrangement would be a strange one. However, it will probably be found that the plans, so far as the exact defining of constituency boundaries are concerned, are only tentative. The committee in charge of the redistribution is only beginning its task and it is by no means certain that what has been foreseen will be carried out in its actual legislation.

Assassin Zangara Goes To Chair

Balford, Fla., March 20.—Giuseppe Zangara, the man who killed Mayor Cermak of Chicago and wounded four others in an attempt to assassinate President Roosevelt at Miami, Feb. 15, was electrocuted Monday.

An autopsy was ordered to follow. Three doctors will make the examination with particular attention to the brain and stomach.

The prison was guarded by squads of National Guardsmen armed with machine guns and stationed on building tops as the switch was thrown sending the current through Zangara's body. Zangara was dead 12 minutes after electricity was applied.

When Zangara saw the chair he stopped suddenly, glances around at the approximately 30 persons who stood in the death chamber. Turning to his guards Zangara said, "Don't hold me, I'm not afraid of chair."

The guards then released the assassin and Zangara walked unaided to the chair.

He looked over the death machine quickly and then strode over to Supt. Chapman and handed him a sheaf of papers on which he had written: "Here is that book I have been writing."

Zangara referred to the book on his life which he said he had started after his arrest in Miami.

"I'm not afraid of that chair," he said, "I'm afraid of the chair seat."

With that he sat down in the death chair and eyed the witnesses curiously as attendants adjusted the straps on hands and legs.

"No cameramen here?" Zangara inquired from the chair. "No one here to take a picture?"

Superintendent Chapman replied "No" just before attendants placed the metal cap on Zangara's head. "Lousy capitalists," he shouted defiantly.

"No pictures, capitalists," he repeated. "All capitalists, lousy bunch—crooks."

Then he said "Goodbye." Adios to all the world. Goodbye.

FALSE ECONOMY

The Brownlee Government of Alberta has cut down the grants for education, reduced the salaries of teachers and proposes to close the Edmonton school. All in the interests of economy. But it steadily refuses to reduce the number of man-hours in the Legislature. Sixty-three members to represent a population of about 450,000 is wasteful and ridiculous extravagance in Civil Government, the like of which has never been equaled in any country in the world. And these members each draw more money for a seasonal gabfest than the average teacher receives for a year's work. What a shame! But the capricious farmers must hold on to power even at the sacrifice and expense of the educational system of the province. This is a glorious example of class government with all its worst features. Exchange

Physical Training Is Vital Today

A FAN
Playing in hockey matches today is like traveling along a road with something new always around the corner. In hockey as on the road, you never know what you'll find, "round the corner" until you get there; but in hockey the "something new" must be observed quickly and the player must act immediately he sees it.

With new technical ideas, new schemes of positional play, and new methods of making hockey more attractive, there is plenty of variety in the modern game. It is useless to discuss definite methods of play in connection with any team at the present time, for tactical policies are constantly changing.

Every player usually has an exceedingly interesting and busy life and to achieve success he must possess an A-1 body and a "hockey mind."

Physical and mental training are necessary, but both are very closely connected. The hockey player's mentality may benefit from theoretical study, but he is likely to reach a higher standard of efficiency by using his head and his body simultaneously.

Some people prefer reading so they can enjoy a quiet rest and mental stimulation after a hard game. There may be some value in the idea, but the usual tendency is to keep players active.

Personally I believe that every hockey player should be encouraged to play every kind of a game to train his eyes and develop the right kind of mentality. After all, there are certain important virtues of simplicity which are common to the puck, football, baseball, tennis ball, golf ball, billiard ball and ping pong ball.

The player who spends a proportion of his time in dealing with the antics of a spherical piece of leather, rubber or cork, will find the most valuable of hockey instincts.

So far as physical fitness is concerned, a player must be a slave to systematic training. Let it be said at once that he should be a happy, carefree, and healthy man. Let it be said, he will not get very far. One sometimes hears of players who think they can, with impunity neglect their health. They will not deny themselves any of their pleasures, and soon anything in the way of rigorous training. Such men inevitably suffer for their carelessness sooner or later.

An ambitious hockey player should get into good condition and maintain a high standard of fitness by a normal life and by taking plenty of exercise. He must be active, alert and abstemious. One cannot formulate general rules pertaining to alcohol, tobacco and diet, for one of the most profound axioms in the world declares that "One man's meat is another man's poison." Moderation in all things, however, is essential for a hockey player. No player can fail to benefit from following the old motto "early to bed and early to rise." Similarly, although a man may eat, drink and smoke with impunity, he will be wise to practice self restraint.

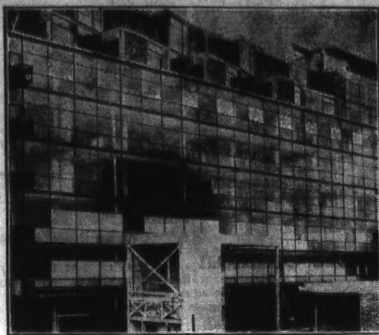

Every player, of course, is responsible for his own well-being. He may need a tactical hint that a large stride, a pivot of foot, and several cigarettes are not the best preliminaries to a match. But as a general rule he can be trusted to carry out his own training and to live a normal life without supervision.

Gymnastics, walking, skipping and running are all important parts of a training programme. Exercise on parallel bars, the horizontal bars, vaulting horse, and climbing ropes will make every muscle of the body supple and strong. Walking helps to develop stamina, provided that one walks in the correct way. The player in training should stride out vigorously with head erect and arms swinging at his sides.

A hockey player cannot be too speedily now-days. Thus running practice as well as skating is essential. A steady dog-trot along the road is one useful form of running practice; but sprinting is necessary for the man who aims at attaining that little extra inch of speed which so greatly influences goal-scoring and quick recovery.

Skipping is a traditional exercise for hockey players. It gives, in a concentrated form, many of the benefits to be derived from running, walking and gymnastics. Skip lightly and skip at a fast pace every morning. Young players particularly, should follow this advice.

SALVATION ARMY GOES MODERNE

The new "Army" buildings which were started three years ago in Paris, thanks to various donations and funds amounting to \$500,000 francs, will soon be finished. The new Salvation Army homes are constructed on strictly modern lines and the chief material used is glass. Our picture shows the south side of the building, which is entirely glass from top to bottom. Bedrooms and convalescent rooms will be situated on this side so as to receive the full force of the benedicting rays of the sun.

Would Leave Quietly

Colonel Lindbergh Not Likely To Broadcast Change Of Residence
Colonel Charles A. Lindbergh had any definite intention of changing his place of residence from the United States he would probably not make any announcement of it but would make his departure as quietly as circumstances would permit. Nevertheless, the word has got about that it was his plan to take up residence, with his family, in some other country, France having been mentioned. It is easy to understand why he should feel so inclined. Possibly it is because it seems such a natural thing for the famous aviator to do that the report has been broadcast.

The Colonel and his family, according to the indications, are dooming to spend their lives in fear of molestation from that despicable element in society which the forces of law and order in the United States seem altogether unable to subdue, the gangsters and others who ply the crimes of kidnapping, blackmail and extortion.

World's Brains Still Busy

Someone Is Always Thinking Of New Things For Invention
In 1843, a current magazine article reveals, an official of the United States patent office resigned because "Everything possible had been invented." Since this gentleman left his post in the snug belief that the world was a finished product, the world's brains have invented the sewing machine, the typewriter, the electric locomotive, the air brake, wireless telegraphy, internal combustion engines, airplanes, cash registers, incandescent lamps, motion pictures and about a million and a half other devices which we now consider commonplace.

Hopes To Better Record
Speaking at a testimonial dinner given in his honor, Sir Malcolm Campbell, who established a new world automobile speed record of 272 miles an hour, said he was hopeful of returning to Daytona Beach, Florida, next year from England to try for a 300-mile-an-hour mark.

Although it is a bird, the New Zealand kiwi cannot fly. Its feathers are incomplete and have the appearance of coarse hair.

Columbia has reduced its tax on private telephones.

Recipe For This Week

(By Betty Barclay)

LENN BASKET PINWHEELS

- 1 cup flour.
 - 2 teaspoons baking powder.
 - 2 tablespoons butter.
 - 1/2 teaspoon salt.
 - 1/2 cup milk.
 - 2 tablespoons sugar.
 - 1/2 teaspoon orange juice.
 - Grated orange rind.
- Mix and sift flour, baking powder and salt, rub in one tablespoon butter, or other shortening, and moisten with a dough with milk. Roll thin; spread with remaining butter, sprinkle with sugar, mixed with orange juice and rind, and roll up like a jelly-roll. Cut in slices and place, cut side up, in a buttered muffin-pan. Sprinkle with remaining sugar, and bake in a hot oven.

BAKED MOULDS

- 1 cup cooked ham, chopped fine.
 - 2 tablespoons butter.
 - 1/2 cup stale bread crumbs.
 - 1/2 cup milk.
 - 1 egg.
 - 1 teaspoon sugar.
 - Salt and pepper.
- Melt butter. Add bread crumbs and milk. Cook five minutes, stirring constantly. Add ham, egg slightly beaten, and seasonings. Pour into buttered custard cups. Set cups in pan of hot water. Bake in a moderate oven until firm. Serve with a white sauce.

Pulp and Paper Industry

Operated On Sound Economic Lines It Would Regain Former Place
When prosperity returns, it should be the task of both Government authorities and those who direct the destinies of the pulp and paper industry to work for an effective control of development, in order that the evil of overproduction may be avoided and the industry allowed to expand in response to normal demands not to artificial stimulus. If it is thoroughly rehabilitated and operated on sound economic lines, there is no reason why it should not regain its former place, but the danger from the American schemers is written plain.—Montreal Star.

The British House of Commons once adjourned to see 11-year-old William Betty, boy prodigy, play in Hamlet. Betty could master the heaviest Shakespearean parts with ease.

Things don't seem half as expensive when you can charge them.

Price Of A Newspaper

Cost Of Production Much More Than Readers Pay
A valued subscriber to the Globe has raised a point which, perhaps, is in the minds of many people when he asked why the price of newspapers remains the same as before the drop in general price levels.

General readers realize that the small amount paid for a copy of a daily paper bears no relation to the cost of producing it. It is merely a nominal sum, which, in the case of a paper like the Globe, does not pay for the cost of the white paper used. It is unnecessary to refer to the cost of handling, delivery and postage, or to the fact that it carries news costing thousands of dollars to collect.

The Simcoe Reformer recently illustrated the difficulties under which newspapers in general are operating by recalling weeklies which have ceased publication and others which have reduced the size of their issues. "Such instances as these," it comments, "should go far toward dispelling the impression that newspapers suffer less from the depression than the average business. As the Bowmanville Statesman remarks, this false impression may be due to the high standards being maintained by the newspapers to create that optimistic spirit so characteristic of editors. The fact is that the publishing business is among the hardest hit."

Despite the fall in prices all around, the newspaper is still the cheapest thing on the market, Toronto Globe.

Discovered By Accident

Conscience Money Nearly Swept Up With Waste Paper
Thrown into a wicket at the Customs postal parcel branch, Union Station Building, Toronto, an envelope containing \$200 in cash landed on the floor and narrowly escaped being swept up and burned with the day's rubbish collection. Just before closing time a clerk at the counter noticed an ordinary white linen envelope lying with waste paper on the floor. It was addressed in pencil, "Customs U.S. Section." It was taken to Superintendent S. G. Taylor. Inside he found a number of bills folded in two, twenties, tens and two fives. A note pinned on blue linen paper stated that \$200 was enclosed to cover duty on merchandise brought in from the United States. The money will be forwarded to Ottawa as "Conscience Money." The money was received in same branch as fifteen \$100 bills, almost the same manner and by the which were thrown in about four years ago. In this instance they were left by a woman.

A Featherweight Airplane

Slow-Moving Machine Is Remarkably Easy To Handle
Britain sees remarkable results achieved with a slow-moving, featherweight airplane. This new type, which is called the "A" type, is designed by C. H. Lowe. A woman beginner recently made a flight after half an hour's instruction, the instructor giving his orders from the ground. After three hours in the air the pupil was able to pass the test for her "A" certificate. The plane carries only a 6 horse-power motorcycle engine. Its top speed is 50 miles. But the big factor is that it lands at the "standstill" speed of 18 miles an hour.

Looking After Draft Horses

Soviets Plan Vaccinations and Fattening Diet Before Spring Work
Millions of horses in the Soviet Union will receive long vacations and special fattening diets under government orders issued for the reconditioning of draft animals before the spring grain sowing. All horses are to be examined. Weak animals will be relieved of work. Horses in the principal grain regions, regardless of their health, will get three weeks' vacation before sowing begins. High mortality among horses due to overwork and undernourishment is responsible for the new orders.

King George Will Officiate

South Africa House To Be Opened In London In April
The opening of South Africa House, the new London headquarters of the South African Government, will be performed by the King, April 1. It is the fourth great Imperial building erected in London, Australia House being opened in 1918; Canada House in 1925, and India House in 1930. Trafalgar Square is much improved architecturally, the new building, which is richly decorated internally with hardwoods and marble brought from the Cape.

Germany Learned Lesson

Not the least striking incident of these times is the fact that the economically most hard-pressed nation of Europe is the one which is getting its face most firmly against any recourse to paper inflation. Germany tried the experiment soon after the war, with consequences which her people are not likely to forget.

Eagle Kidnapped Baby

Little Skeleton Found In Nest After Two Years
Cold ran the blood of a Finnish farmer one day in 1917. His 2-year-old child had been playing outside his cottage near the Russian border. Now the baby was gone. He and his friends searched far and wide, found no trace. A few weeks later, near the farmer's home, lumbermen brought down a tall pine tree. High in the branches they spotted an eagle's nest. They came close to examine it. What they found made them cross themselves. There, surrounded by tatters of baby-clothing, lay the skeleton of a 2-year-old child.

Proves Real Help

The Christian Science Monitor says now that methods have been found by which "lumber" may be manufactured from corn-stalks, oat hulls, sugar cane, straw and weeds, it appears that the agricultural situation is being helped by more than one kind of a farm board.

Drifted Many Years

A bottle containing a card of the hydrographic department of Japan was found on the beach a mile south of Tillamook Bay by C. L. Barvier, Oregon. The bottle was sealed with wax and contained a card indicating it had been set adrift June 6, 1911.

Wholesale commodity prices in Japan have risen 20 per cent in the last year.

Spain plans to spend \$35,000,000 on new school buildings.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver LIVER—Without Calomel
You see "feeling lousy" simply because your liver is out of order. It is the most important organ in your body. It filters out all the poisons from your blood. If it is not working properly, you will feel lousy. It is the only organ in your body that can be made to work again. It is the only organ in your body that can be made to work again. It is the only organ in your body that can be made to work again.

Deep ditch at the side of a highway is a safety trap, for far as motor traffic is concerned, many lives have been lost, because there was a useless ditch at the side of the road.

Although cooler than the outside air, the interior of the Great Pyrenees of Otzheim is excessively hot due to lack of ventilation.

+ Do You Know? +

That the Long Eared Owl, fierce as he looks, is one of the farmers' best friends? He has a great liking for field mice and devours thousands of them every year. As the picture shows, life is quite a serious thing with the Long Eared Owl and that when he is out for business he evidently means it.

Tired Of Depression Talk

Woman Mining Recorder Returns North Where People Do Not Grumble
Tired of talk of depression which she has continually encountered in the cities, Mrs. F. Muncester, British Columbia's only woman mining recorder, started the return to Squaw Creek, near the boundary of the Yukon and Alaska. "At Squaw Creek," she says, "things were never exactly prosperous, but folks take things as they are and never grumble. Why, they don't even know there's a depression. Things go on just the same."

Mrs. Muncester took in a team of sleigh-dogs and supplies and she plans to make the trail to Squaw Creek before the ice thaws. Her goal is reached by way of Haines on the United States side and Pleasant Valley, a former Mounted Police outpost.

"As a matter of fact, conditions are better at Squaw Creek now than ever before," says Mrs. Muncester. "Most of the people are trappers, with about one white man to five Indians. There's not much money in fur these days, but gold was discovered up there not long ago and the miners are making from \$8 to \$15 a day in some places, with absolutely no place to spend their money."

Artists Very Seldom Have Beautiful Hands

Photos Show Them Strong and Capable But Not Decorative
The idea that hands exhibit more character than faces, and that artists' hands are invariably soft, slender and graceful, is nothing but a snare and a delusion, Mrs. Alma Reed says. Mrs. Reed opened an exhibition in New York of more than 150 photographs of hands of famous men and women, actresses, prizefighters, writers, painters, politicians and housewives.

"The hands of famous actresses," she said, "are almost universally beautiful. Long, slender fingers, meticulously cared for nails and smooth contours are characteristic. Their hands are decorative, as they should be. But when it comes to musicians, writers, sculptors, male or female, the rule does not hold true. Their hands are apt to be strong-capable, yes, but not necessarily beautiful."

Winnipeg Newspaper Union

By Ruth Rogers

ROUND YOKE CONTRIBUTES YOUTHFUL LINE TO THIS SMART WOOL CREPE

It's the sporty woolen dress so beloved by youth and youthful woman types.
To be certain its carrot-red, a Paris favourite. A wide black sash belt marks the waistline. It's very simple to make it. Just follow the pattern to the pattern. You'll be amazed at the short time it will take you, and of the small expenditure.
Style No. 927 is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 3 1/2 yards of 39-inch material.
Plain and printed crepe silk are very smart for this model. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap copy carefully.

Nothing lowers and depresses you more than the poisons of constipation. Take Eno every morning.

TAKE ENO'S FRUIT SALT

WORLD HAPPENINGS BRIEFLY TOLD

Possibility of using surplus farm crops of the United States for the production of alcohol as an aid to agriculture is being studied at the request of President-Elect Roosevelt. George Bernard Shaw viewed the great wall of China from an aeroplane at a height of 8,000 feet, but had nothing to say regarding his experience.

Hon. Vincent Massey, former Canadian Minister to the United States, will be given the honorary degree of Doctor of Laws by McGill University, Montreal, at commencement on May 25. So many automobiles have been pawned in Paris, where the municipality runs the pawnshop, that a new garage to accommodate 2,000 cars is being built.

Alberta government does not favor appointing a commission to survey taxation. Premier John Broome informed a delegation from the Alberta branch of the Canadian Manufacturers' Association.

After many years' public controversy over the divorce question, the Chief Justice of Trinidad has granted the first divorce in the island's history. The hearing took only forty-five minutes.

John Robert King of Vancouver, prominent figure in the mining, fishing and lumbering industries of the Pacific Coast in pioneer days, is dead aged 80. He was born in Madoc, Ont., and came to British Columbia in 1870.

Prof. August Piccard, explorer of spaces 10 miles above the earth, is convinced he can build an aeroplane capable of flying through the stratosphere at 500 miles an hour, if he were furnished \$500,000 for the purpose.

The Japanese Government through the embassy at Washington, issued a 6,000 word statement in defence of her military activities in Manchuria and her actions at Geneva in the face of condemnations on the part of the League of Nations.

Fish Cargo By Air

Former Two-Day Trip Now Takes Half An Hour
Within half an hour after white fish are caught in the lakes of northern Manitoba they are delivered to a point by aeroplane on the Hudson Bay Railway, 35 miles away, for transit from this point by rail to cities in Canada and the United States where they are in demand. Formerly the 35-mile journey by horse and tractor took two days over rough trails.

The inland fisheries of Canada are among the country's most valuable assets. The fish caught in large quantities for the commercial market in Manitoba come from Lake Winnipeg, Lake Winnipegosis, Lake Manitoba and the smaller lakes. White fish and pickerel are the chief fish caught, but pike, tullibee, gold-eye and several other varieties are plentiful.

Not So Good
A London doctor touring in the provinces, had difficulty in obtaining suitable lodgings in a small town. One landlady, showing him a dingy bedroom, remarked, persuasively, "As a whole, this is quite a nice room, isn't it?"

"Yes, madam," he agreed, "but as a bedroom it's no darn good."

It is strange that many of those alarmists who foresee the destruction of all culture by machinery use the radio to broadcast their fears, read their speeches from a typewritten manuscript and then ride home in a taxi.

Million sometimes has had more than 300 words to a sentence in his writings.

TIRED AND IRRITABLE?

Take Lydia E. Pinkham's Vegetable Compound

It steadies the nerves and helps to build you up. You will eat better... sleep better... look better. Life will seem worth living again. Remember that 98 out of 100 women say, "It helps me." Let it help you too. Liquid or tablet form, as you prefer.

Board of Trade

The Board of Trade have arranged for Prof. A. E. Cameron, of the Department of Mining Engineering of the University of Alberta, to give an illustrated talk on the Great Bear Lake and adjacent mining areas in the north country.

A presentation of a bronze life saving medal will be made to Mr. Redden, and certificate to Mr. Ranker, by Mayor Knott, of Edmonton, on behalf of the Canadian Humane Association. A turkey dinner is being provided by the ladies for \$60, which is a small charge for a full evening of pleasure and interest. The date is Wednesday, March 29, at 6:30 and the place is the Church Hall.

Interesting Debate

"Resolved that Modern Sport is Unsportsmanlike," was the subject of a debate sponsored by the United Church Young People's Society on Friday evening. Margaret Finch and Herman Zimmerman of Ponoka upheld the negative and won over Catherine Newton and Tom Johnson, of Lacombe who spoke for the affirmative. Rev. T. E. Davies, Ponoka, Mr. J. S. McCormick, Solicitor and Mr. C. M. Lavery, Principal of Lacombe High School, officiated as Judges. In bringing their decision for the negative, Mr. Lavery offered some helpful criticism: i.e., a good deal of the time the debaters did not stick to the subject; there was a tendency on both sides to fail to clinch their arguments; unqualified statements were made which are not actual facts; contradicted each other without giving authority for statements made points for their opponents, and also made several errors in English. As the Judges had been asked to criticize severely they had done so, but Mr. Lavery expressed the hope that these criticisms would prove of a helpful nature in future debates. The winners in the Lacombe Presbytery are to compete with the winners of the Edmonton Presbytery.

Legion Party

The Canadian Legion have decided to hold another waist drive, which have proved so successful in the past, on Friday, March 31st, at 3:30 p.m., in the L.O.A.F. hall. A unique feature of the drive will be an exhibition checker match between Mr. W. McRobbie and ten or more players from the town and district.

He will endeavor to play all players, collectively, as one contest. All players who desire to take part, will get in touch with Mr. Ted Mann of the Telephone exchange and supply their own board and pieces. The admission fee will be 25c. to all card players and checkerists. A good lunch will be provided.

Young Ladies Will Entertain

CONCERT AT UNITED CHURCH
The Young Ladies' Auxiliary will put on a concert in the United Church on Friday night, March 24th.

Canyon News

Decidedly, the Canyon has come, and intends to stay on the map; for on the 17th instant, being St. Patrick's Day "A Hard Time Dance" took place and at it at any time a good time would be had, there was very little sleep, for spirit and good will reigned high actually among the folks.

Although there were many good hard-time looking suits in display on some of the dancers, the first prize for women was awarded for the originality to Mrs. John Henderson and the Men's first prize went for the same reason to Frank Christman, as he wore a suit that was well patched up and carefully outworn as well as some one percent as "he must have been a well suit in his day."

Everyone present enjoyed themselves to the wee sma' hours, rising bigger, anticipating a better time if possible on the 31st March, when a programme is taking place, which promises to be the best entertainment of the season.

Now folks, don't grow impatient. Just keep the date in mind—March 31st. Canyon School House 8:00 p.m. A programme intermingled with

Town Notes

Be sure and come to the United Church on Friday night to hear all about "My Husband."

The third Annual Vinny banquet will be held in the Church Hall on Friday, April 7th, at 7:15 p.m. The principal speaker for the evening will be Mr. Hugh C. Fackling, M.L.A., of Calgary. Further announcements will be made later.

Friday night at United Church our Suffragette will tell you how to train men to look after household duties, while she looks after the business of town.

Beginning next Sunday evening, the first of a series of Easter sermons will be given in the Lacombe Baptist Church by Pastor H. Fred Hargreaves, entitled "Hardened Hearts Amongst Humanity."

Come and see the excitement in town on Friday night at the United Church when the Mayor's son returns from College.

Watch for Satin Glo sale which will occur next month and will save you money. Lacombe Furniture Store.

At the Canadian Junior College, Dr. E. A. Corbett will give an address on "The Early History of Alberta," on Saturday evening at 8:30, to which you are invited.

Beds, Springs and Mattresses are better and lowest prices ever known in our history, at Lacombe Furniture Store.

Remember the dance at Bentley tomorrow night (Friday). Music by Bob Paulsen and his Band.

No. 61 Varnishes and Floor Enamel Rogers One Hour Enamel (guaranteed), Satin Glo inside paint, at the Lacombe Furniture Store.

At the Annual Meeting of the Lest We Forget Club the following officers were re-elected by acclamation: Mrs. Wilson Risson, President; Mrs. C. B. Halpin, Vice-President; Mrs. Wm. Cranna, Secretary; Mrs. Seymour Edmunds, Treasurer.

Lay in a good supply of Mac's Best No. 1 Patent Flour, per 98 lb. cotton sack \$1.38. Every sack guaranteed. W. J. Trott, Lacombe.

The members of the Lest We Forget Club spent a most happy evening at the home of Mrs. Rhind, last Wednesday after the general business meeting. A dainty supper was served after which a social time was spent in recalling old times, interspersed with music by Mr. Wind and Mrs. Wilkes. Mrs. A. Landie, Hon. President, was a welcome guest. Two new members, Mrs. T. Wilkes and Mrs. W. Rankin, were also welcomed.

2 in. Steel Bed (walnut) cable spring, felt mattress any size \$20.00, Lacombe Furniture Store.

Roy Butcher, 7 year old son of Mr.

and Mrs. Byron Butcher, of Lacombe, died at the Lacombe Hospital Wednesday, following a very short illness. The funeral will be held on Friday (tomorrow) from the United Church. The sympathy of the entire community is extended to Mr. and Mrs. Butcher in their bereavement.

Aristocrat, inner Spring Mattress, the best mattress made \$37.50; other Spring filled mattresses as low as \$18.00 at Lacombe Furniture Store.

In the men's skating race race, last Wednesday at the Carnival, Bill Robinson beat Kenneth Watt by quite a margin. Both skaters showed plenty of speed but Bill certainly had the edge. Careful coaching by H. S. Murray showed its effects plainly on Bill's skating.

As Mr. Layton is absent attending a session of the Foreign Mission Board at Toronto, St. Andrew's pulpit will be filled by Dr. J. E. Dudson, on March 28th and by Rev. T. H. Mitchell of Edmonton on April 2nd, the latter date being celebrated as Anniversary Sunday. The choir are also presenting another song service following church next Sunday and are asking for the usual contribution.

The St. Patrick's Dance held last Friday night at the Adelphi Hotel, was not as largely attended as was expected. Everyone present, however, had a good time. The supper provided at midnight was exceptionally good. Music, which was provided by Bob Paulsen's Band was all that could be desired.

BIG YEAR AT CREAMERY
The Lacombe Creamery in 1932 turned out 240,500 pounds of butter, an increase of 10,000 lbs. over 1931; in addition they handled 17,000 dozen eggs, and 11,000 pounds of live and dressed poultry. The creamery reports good outlook and better prices this spring, as there is an increasing demand for creamery products.

BENTLEY NEWS
Showing at the Bentley Community Hall, on March 30th, Janet Gaylor and Charles Farrell in "The First Year." Special Added Attraction, "Red Shadow," starring John Boles. This is a short story of "The Desert Song." 8:30 p.m. Admission 30c.

ST. ANDREW'S CHURCH

The CANADA STARCH CO., Limited, MONTREAL

F. E. McLeod Spring Footwear for Women and Girls

\$3.75 Smart styles from reliable makers. Pumps, Straps, Ties, Oxfords, Patent Kids, \$3.75 or Calf Leathers; lasted in a variety of styles suited to street or dress wear; Sizes 3½ to 8

Special Value—Silk Hose Service Weight 89c.

Want greater value, greater service and smartness in your Spring hose? Then you'll be pleased with this Special. A manufacturer's clearance. Three standard Spring colors. Sizes 8½ to 10.

Women's Capeskin Gloves Fashionable For Spring \$1.25 and \$1.75

Trim tailored gloves in slip-on styles with applied cuffs. Serviceable and smart. Colors brown and beige. Sizes 6½ to 7½.

The New Spring Frocks Are Right in Line Fashion—\$5.75, \$7.50 and up to \$15.00

Our racks are full of smart new style frocks. Puffed sleeves, long sleeves and sleeveless. Rough Crepes alone or combined with prints, flat crepes, sheer crepes in the new colors. Sizes 14 to 46.

Women's Spring Coats \$17.50, \$12.50, \$9.75, \$8.95
All the smart new ideas are shown in these new coats. Flattering Spring models, fashionable wools, interesting puffed sleeve treatments. Celanese linings. Sizes 14 to 40.

Men's Spring Caps \$1.25 and \$1.75

New wools, light weight, nicely finished and silk lined. Sizes 6½ to 7½.

Knitted Wool Suits and Dresses—Everybody Will be Wearing Them This Spring—\$7.95

One and two piece dresses and three piece suits. Popular for every month in the year. Sizes 34 to 40.

Men's Felt Hats \$2.50

The styles well dressed men are wearing this Spring. The popular shades. Silk lined.

Men's Hartt Shoes for Spring \$6.75

A man never regrets buying quality and in Hartt shoes you get the limit in style and quality. Just in, black calf and kid oxfords. Made over the new lasts. Sizes 7 to 10½.

Chatelaine Patterns—All One Price 15c.

60c. Girl's Wool Hose—Clearing at 45c. pair

Fine quality wool ribbed hose to finish out the season. Long legs, smooth, good fitting feet, reinforced for Extra Service. Sizes 6 to 9½.

Special—Factory Cotton About 40 inches Wide 10 yards \$1.25

A light weight cotton, free of dressing, suitable for comfortor linings.

We Have Put A New Low Price on Men's Tailored-To-Measure Suits \$22.00

And we guarantee a satisfactory fit. Suits tailored from English tweeds and worsteds. All new 1933 patterns. Celanese Satin linings. Let us show you.

Pique Broadcloth Dresses—Smart New Styles \$1.95

Out of the ordinary styles. Smarter, more becoming. Stripes and conventional designs. Sizes 16 to 48.

25c. and 30c. Gingham and Printed Broadcloth Short Lengths Clearing yard 19c.

Fast colors for aprons and wash frocks.

Monarch Wool

More than 50 shades. Dove, Andalusian, Fairy, Tweed.

Knitting Instruction Books 15c. and 25c.

A wide choice.

Daisy Knitters 25c.

Popular for knitting sweaters and tams.

Circular Knitting Needles 35c.

Used for knitting skirts.

Spring Underwear for Girls Vests and Bloomers each 35c.

Soft cotton garments in a medium weight, suitable for Spring wear. Sizes 6 to 8 years.

Grocery Department

Jam: Orchard City, Strawberry, Raspberry and Apple, 4 lb. tin 36c.
Cheese: finest Ontario Billtons, lb. 25c.
Oranges: Sunlight, dozen 28c.
Grape Fruit: Texas, each 10c.
Lettuce: fresh, crisp heads, each 10c.

ORANGE PEKOE BLEND

"SILVER" TEA

"Fresh from the Gardens"

Welcome Announcements.

The recent statement by Premier Bennett in the House of Commons in which he outlined the attitude of himself and his Government on the subject of reciprocity trade relations with the United States, and in which he declared that the United States was Canada's natural market, constitutes, not only an announcement of great interest and importance, but it has the effect of removing, at least so far as the principle involved is concerned, this particular phase of the tariff question from the realm of partisan politics. Differences of opinion as to details of any such trade arrangement may exist or develop between the two great political parties in this country, but so far as the question of the desirability of such an arrangement, it has now been quite plain that there is no difference of opinion.

To all those who feel that the important question of the tariff should, as far as possible, be removed from the arena of partisan political controversy, this unanimity of view will be most gratifying, as well as a most hopeful sign that at no distant date a marked improvement in the trade relations of these two great countries, having so many things in common, and divided only by an imaginary boundary line, will be effected.

Premier Bennett made his momentous announcement when speaking to a resolution moved by a Liberal member, and which was worded as follows: "That, in the opinion of this House, it is expedient that the Government of Canada re-open negotiations with the Government of the United States of America with a view of bringing about a satisfactory reciprocal trade agreement between Canada and the United States whereby the natural products of Canada, that is the products of the sea, the farm, the mine, and the forest, and including fish, lumber, wheat, etc., should have free entry into the United States in exchange for the admission of certain goods from the United States of America, which in the interests of both countries may be admitted into Canada, free from customs tariffs."

Almost equal in its importance to Premier Bennett's statement, is the announcement contained in press despatches that the new Administration at Washington, under the guidance of President Roosevelt, proposes to make overtures to the Canadian Government looking to the negotiation of such a trade agreement or treaty, if, indeed, such overtures have not already been tentatively made.

Canadians generally will welcome these new developments, and nowhere will they be received with greater goodwill, and with sincere hopes that success will attend such negotiations, than in the provinces of Western Canada. Unquestionably, the continent of North America is one economic unit. Now, or it may be divided politically and nationally. Nature made it so geographically and climatically.

The United States can supply Canada with many things we do not, and cannot, produce for ourselves—cotton, tropical and semi-tropical fruits, anthracite coal, many articles of manufacture, to mention only a few items. On the other hand, the United States stands in need of enormous quantities of our natural products which Canada can supply in abundance. Why, then, should both countries erect barriers against the natural exchange of such commodities to the disadvantage of both?

Here in Western Canada we can raise tens of thousands of head of range cattle, but we are handicapped in finishing them for market, including the British market, and are at a distinct disadvantage in competing with the Argentine. But the United States raises enormous quantities of corn for feeding purposes. What is more natural than that Western Canada should ship thousands upon thousands of stock cattle to the corn states to be fattened for market? Both countries would profit thereby.

Why should the Maritime Provinces be forced to look for markets long distances inland in Ontario and Quebec, even in the West, with the rich markets of the great cities along the U.S. Atlantic seaboard right at hand and easily and cheaply reached by water transportation? Why should Ontario, lacking coal supplies of its own, be denied free and cheap access to the great coalfields immediately to the south but in the United States? Why should other country cripple the natural flow of trade north and south, fighting geography in an uneconomical fashion, while striving for markets thousands of miles away?

It is now admitted, almost universally, that the troubles which today beset the world are almost entirely of our own making, the result of our own blindness and stupidity, and not the result of an all-wise Providence nor the breakdown of the immutable laws of Nature?

Canada and the United States have set the world an objection lesson for more than one hundred years of an undefined boundary line thousands of miles in extent. We have shown the nations of the world how international relations should be conducted so as to avoid all physical warfare. Can we not also show the world, in its present time of distress, how international economic relations should be governed so as to avoid economic warfare?

Assuredly we can, if we will. And it is because we should do so that these announcements of the past few weeks are so welcome, so promising of great betterment for the peoples of both countries. And to us in Canada especially welcome as indicating a unity of desire and policy on the part of all our political parties in the advancement of the common good and economic welfare of this Dominion.

Catalogues Human Diseases

Retina of Eye Affected By Any Abnormal Condition

Practically every disease common to man, says Dr. Clarence R. Ellis, of the Ohio State University applied optics department, can be diagnosed by an examination of the retina of the eye.

Any abnormal condition, he explained, affects the retina immediately, particularly such diseases as brain tumors, heart trouble, cancer and inflammation of the liver.

The chief cause of eye trouble, he added, is the use of powerful light bulbs in reading lamps.

Canada's Shoe Industry

One of the Canadian industries to show increased production in 1932 was the leather boot and shoe factories. A corresponding decline was apparent in imports of these commodities. In 1932 Canadian factories produced 17,878,218 pairs, while imports totalled only 343,965 pairs.

Switzerland has established import quota restrictions on radios.

Immunity From Plagues

Better Sanitation and Public Health Legislation Stamps Out Disease

One of the most important of all developments in the last 32 years has been in sanitation and public health, affecting the lives of everybody. It is not so far back when towns and cities had well water, generally polluted with its accompaniment of typhoid fever outbreaks. There were also diphtheria epidemics while smallpox was not at all unknown in virulent form in many communities. Immunity has been wonking. St. Catharines Standard.

Appliance For Railroads

Any sudden depression in a railway track is instantly detected and marked on a chart while the train is passing over it by a new appliance in imports of these commodities. It does away with the need of a daily inspection of the line.

Great Britain has the highest taxation. France comes second and Germany third.

Headaches and Dizzy Spells Nerves In Bad Condition

Mr. Neil Crawford, Hamilton, Ont., writes: "My nerves were in such bad condition I found it almost impossible to get a good night's sleep. I was also bothered with headaches and dizzy spells."

I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Heart and Nerve Pills I could hardly believe the change they had made in my condition."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Electric Eye Records

Activity Of Housewife

Information Obtained By U.S. Bureau Of Home Economics
For each member of her family, the average housewife makes 18 trips a day to the kitchen sink, according to a February issue of the American Journal of Home Economics.

Each time she goes to the sink, the article shows, she spends, on an average, one minute.

Thus, the housewife in a family of five will average 90 trips daily to the sink and will work there for an hour and a half.

A photo-electric eye was used to help record every trip made, together with the time spent at the sink. The U.S. Bureau of Home Economics was asked to make this study by the chairman of the committee on kitchens of the president's conference on home building and home ownership, and it received outside co-operation.

An analysis of this study shows that the Washington, D.C., housewives in whose kitchens the photo-electric eye was placed, spent from 38 to 192 minutes at the sink each day, while the number of trips varied from 32 to 217. The reasons for such variations, according to the article, could be determined only by more detailed studies. The definite factual data hitherto unavailable in such studies should make possible more definite conclusions as to the comparative efficiency of different types of kitchen arrangement. Dr. Stanley says.

Rich Gold Strike

New South African Field Opens Up Great Possibilities

Another great gold strike—possibly equal to past rushes which helped end former depressions—was described to the American Institute of Mining and Metallurgical Engineers.

One-eighth of the world's present gold production is the estimate, though not yet proven, capacity of this new field, the Consolidated Goldfields, South Africa, the dazzling estimate was reported by P. W. Lee, supervising engineer, geophysical section, United States Bureau of Mines, Washington.

It caps several weeks of reports in inside circles of New York engineers that the new South African field might produce enough gold to start the ball rolling toward world prosperity.

Lee told the story of how the new scientific "diving rod," the magnetometer, located the ore.

"The greatest outstanding achievements of the year," said Mr. Lee, "was made by the engineers in the Consolidated goldfields. Here the sub-outcrop of the main reef series was traced from Middeval through properties of the Westward area, a distance of from 30 to 40 miles."

Another Use For Radio

Fever Machine Is Newest Treatment For Certain Diseases

A "fever machine" which treats disease by the power of radio waves, to raise the temperature of the body was described before the American College of Physicians at Montreal.

It is a new application of radio, treating disease instead of sending messages, and was reported by Dr. Walter M. Simpson of Dayton, Ohio. The machine is used in treating diseases that are sometimes cured and often improved by producing artificial "fevers" in the body. Among these diseases are general paralysis, a form of paralysis that attacks many insane persons, some forms of arthritis, a disease of the joints, and diseases that affect the bodily extremities—arms and legs, feet and hands.

The fever machine is a short-wave radio transmitter, which "broadcasts" 30-meter radio waves through the patient from large metal plates.

Long Gas Line

Proposed To Build Gas Line From Alberta To The Coast

The findings of the Alberta conservation commission is expected to have a bearing upon the plans of oil syndicates to construct a pipe line through to the coast to supply the cities of Vancouver in British Columbia, and of Spokane, Seattle and Tacoma in the state of Washington, with natural gas. It was stated by William C. Fisher, of Calgary.

"This is not a visionary project," said Mr. Fisher. "The findings of the conservation commission will determine the extent of the gas pressure in the Turner Valley area."

"If it is proved that the field can guarantee a 20-year supply, there should be nothing to hinder the proposed gas pipeline to the coast for the supply of cheap natural gas."

A machine in the coast and geologic survey office at Washington, D.C., can predict the tide for any place in the world, at any hour, for centuries to come.

Canada's acreage in field crops increased from 15.6 million in 1890 to nearly 58 million in 1931, or by approximately 272 per cent.

Ninety per cent of the world's clothing is made of cotton.

People of Denmark are against the idea of using silver in coins.

REBELS' COLDS

Never "dose" except on doctor's advice

BEST FOR ADULTS, TOO

THE WAR DEBT PROBLEM

New York Banker Would Cancel Actual War Loans

Cancellation of pre-Armistice debts and "commercializing" the post-war obligations was offered as a practicable and attainable solution of the war debt problem by Walter T. Rosen, senior member of the international banking firm of Lazard, Frères, and Co., in an address before the faculty and students of Union College and banking and industrial leaders at Schenectady, N.Y.

The ideal solution, Mr. Rosen said, would be cancellation, "for it would prove of greatest benefit to our country in the shortest time," but that, he held, is too much to expect "in view of the political aspects of the war debt problem." He pointed out that the party about to assume power, and the vain hope that has been allowed to sink into the soul of our people that these debts are good.

Regarding his "practical and attainable solution," Mr. Rosen proposed a lump-sum settlement with all debtors.

"From 1914 to 1917 we grew fat on the misery of the Old World, not through any doing of our own, but by reason of circumstances," he said. "Our industries and farmers flourished. The enormous amounts spent here by the belligerents enabled us to enter the contest with greater resources than we had ever before possessed."

"Believing that pre-armistice credits should be treated as contribution to the common cause, I venture to suggest the following formula for final settlement."

"Waving of all pre-armistice debt; post-armistice advances of roughly \$3,270,000,000 to be paid with interest at 3 per cent; excess of payments hereafter made by allied debtors or countries above 3 per cent. interest to be applied in reduction of principal of post-armistice debt."

"A sum around \$1,500,000,000 is found by this computation. Such a global settlement should bring into the United States Treasury within a reasonable period, a fund, which, now owing but apparently uncollectable, is still large in the light of present day conditions."

Has Plan Completed

Wrigley Increasing Employees' Wages and Cutting Working Hours

Philip K. Wrigley, gum manufacturer, completed his plan for increasing the wages of his employees, shortening their working hours and providing them with assurance of some income even if they are laid off.

The plan entails:

1. Increase of the minimum wage scale.
2. Ten per cent. reduction in working hours and a corresponding increase in wage per hour.
3. Guarantee of 25 per cent. of salary to all employees laid off.

While emphasizing that he is advancing his plan only for his own business and not as a cure-all for the depression, Wrigley also made it plain that he believes the logical road to business recovery lies in increasing wages in the lower brackets of industrial labor.

Dog Runs Elevator

"Bal," a German police dog, has mastered the mysteries of elevator operation. He visits his owner, Robert Mullen, daily in a Denver office building, using his nose to push the button that sets the automatic elevator in operation. He also makes occasional visits to other tenants in the building, going from floor to floor unattended via elevator.

Purchase Made Too Easy

May be the attempted assassination in Florida will call public attention to the ease with which murderous weapons can be obtained in many parts of the United States. Zangara on murder bent, bought his revolver expressly for the purpose of killing Mr. Roosevelt, and had no more than making the purchase than if he had been buying a package of cigarettes.

There are close to 20,000 people of Icelandic origin in Canada. The 1931 census gives the number as 19,382 of whom 9,872 were male and 9,510 females. The majority of them, 13,450, live in Manitoba.

A \$4,250,000 paper mill is being built at Ellmers, England.

Robe Proved Good Mascot

Gift Of Maori Chief Treasured By British Admiral

Admiral Sir Lionel Halsey, commander and treasurer to the Prince of Wales, told the Admiralty Club at London, England, of a New Zealand "kiwi" robe which he wore whenever he fought in action during the Great War.

The garment, a kind of kilt made of flax, was given to him by a Maori chief when he was in command of the battle cruiser "New Zealand." The "New Zealand" went on a cruise to the dominion. One chief, after being shown over the ship, gave him the robe. Whenever he took the ship into action he would wear it. He told him that it had been worn by his forbears in war, but that it would never be required in that country again.

On August 29, 1914, when the action of Jutland was fought, Sir Lionel said he wore the robe in the conning tower, and he added that the "New Zealand" never received a scratch during the fighting.

After this the garment was looked upon as a mascot. On Jan. 24, 1915, the "New Zealand" fought the German ship "Blucher," which was sunk. Again he wore the "kiwi" with the same result, the "New Zealand" receiving no damage whatever.

In May, 1915, he left the "New Zealand" to Captain, later Admiral, Sir John Green. He handed over the "kiwi" to his successor and in the Battle of Jutland Captain Green wore it when he took the ship into action. Two ships in his own line were blown up and sunk, but the "New Zealand" received practically no damage whatever. After the war, Sir Lionel added, the garment was returned to him and it was one of his most treasured possessions.

Popular Port Of Call

St Thomas In Virgin Islands Has Much For Tourists To See

Charlotte Amalie, St. Thomas, is the home of bay rum and good bay rum on this Virgin Island is now as cheap as rubbing alcohol. When the Cunard liner "Caledonia" called on her winter cruises, the tourists carried away hundreds of cases, as is the custom in this year with cruising ships. The bay rum comes packed in gift bottles.

But this fair lot is only part of St. Thomas' fame. There is considerable here for the winter tourist to see, including:

The old Delano house where General Sherman, of New Mexico, lived during one of his periods of exile.

The Ma Follie canteen, from which practically all the Virgin Islands may be seen.

Blackbeard's Tower and Bluebeard's Castle, both teeming with romantic interest.

Native women coaling steamers; houses that date from the seventeenth century; diving boys who never lose a coin thrown to them; back-of-all, the alum down; the shops where prices are extremely low.

West Mountain, rising to a stark height of 1,550 feet; the tropical garden; the time gun that never goes off at the right time; Krum Bay, in the ship graveyard of which many beautiful bowerbird figureheads may be seen, and the old Danish fort, which terms with the attractive atmosphere of antiquity.

Proposes Revised Dollar

Professor Leacock Suggests Reducing Gold Content To Seventeen

Proposal to re-establish the redeemable gold standard with a dollar of 17 grains of gold instead of the present 23 was made by Prof. Stephen Leacock, head of McGill University's political economy department, in a speech before the Empire Club at Toronto.

This, he claimed, would cause immediate rise in prices and stimulate production of all sorts. "The gold from the Canadian mines," he explained, "would be taken as the basis of a paper currency redeemable in gold at 17 grains to the dollar. The \$60,000,000 now produced annually would represent \$80,000,000 in the new dollar and could be used to carry \$240,000,000 worth of paper. Of this, one-third would pay the mine owners."

Some historians aver that America was once called Pung and that a Buddhist missionary visited it as early as 450 A.D.

So rapidly has post-war ship design developed that a modern 40,000-ton liner costs less to run to Montreal than a 20,000-ton 30-year old rival.

CHEST COLDS - A MECCA OINTMENT AND MUSTARD POUCE

Relieves Congestion - Deep Mucous Blister

At first signs of a cold on the chest apply a Mecca Poultice with the addition of mustard. The result is quick relief from chest congestion and relief from the chest. Full directions in each package.

Edinburgh's Own Brand Corn Syrup

pure, wholesome, and economical table Syrup. Children love its delicious flavor.

THE CANADIAN STARCH CO. LIMITED, MONTREAL

Art Competition

Manitoba and Quebec Student Architects Win Awards

Manitoba and Quebec student architects won awards in the Royal Architectural Institute of Canada competition, result of which were announced recently.

Leofee Daigne, Ecole Des Beaux-Arts, Quebec, won first prize in the class "A" project, in which 53 designs were submitted, and Eric Thrift University of Manitoba, was awarded first prize in class "B" project. Forty-nine designs were submitted for the latter class.

Maurice Germain, Ecole Des Beaux-Arts, Montreal, won second in class "A" project; G. R. White, University of Toronto, won third, and William Sheets, University of Manitoba, received honorable mention.

In class "B" Lowell Wallace, University of Manitoba, was second, and I. M. Saunders, University of Toronto, third. The University of Alberta had one design entered in the class "A" project and eight in class "B" but won no prize.

The jury of award consisted of: H. L. Featherstonhaugh, Montreal; Irene Vautrin, Montreal; Wilfrid Lacroix, Quebec; John M. Lyle, Toronto, and H. J. Burden, Toronto.

Aviator Was Popular

Took Fresh Vegetables To Arctic Miners In Severe Weather

Leigh Brintnell, president of MacKenzie Airway Services, Limited, was the Edmonton pilot who in the Great Bear Lake mineral fields on New Year's Day.

With the thermometer hovering at 60 below the zero mark Brintnell swooped down with a load of 600 pounds of fresh vegetables from Edmonton for mining men at the Eldorado holdings.

After a diet of canned goods and meat for several weeks the vegetables brought by Brintnell were a welcome addition to the larder of the hardy winterbound miners.

Brintnell's boat is the one that he made the long flight from Edmonton to Great Bear Lake, under most severe weather conditions without having a single head of lettuce or as much as a tomato frozen. A special heating device, designed by Brintnell, was installed in the cabin of his machine.

Stratosphere Plane

Prof. Piccard Believes He Can Build a Plane That Will Cruise Upper Spaces At High Speed

Prof. August Piccard, explorer of spaces 10 miles above the earth, is convinced he can build an airplane capable of flying through the stratosphere at 500 miles an hour.

The statement came in answer to a question by Dr. John Carruthers, secretary of the University of Toronto, secretary of International Relations, as to whether the Swiss scientist thought he could construct such a plane if he were furnished \$500,000 for the purpose.

"I believe I could do so within a year and a half," he said. "And in my opinion, the stratosphere plane is a thing of the not very distant future."

Professor Piccard last August ascended to an altitude of 10,455 miles in a special balloon to obtain experimental data on cosmic rays.

Canadian Egg Inspection

In 1931 the Egg Grading Service of the Department of Agriculture inspected 769,919 cases of eggs. In addition to the regular work of inspection by approval, the inspection staff was called upon to inspect and grade eggs throughout the country. This is for the purpose of checking up outgoing shipments of deliveries, the purchase of current receipts from producers, country store-keepers and jobbers, and giving instructions to dealers in canning and grading in accordance with the Canadian Standards.

A Mark Twain Story

When Mark Twain was a young and struggling newspaper writer a lady of his acquaintance saw him one day looking at a shop window, with a cigar box under his arm. "Mr. Clemens," she said, "I always see you with a cigar box under your arm. I am afraid you are smoking too much." "It isn't that," said Mark Twain. "I'm moving again!"

A patent for a medical compound is obtained only in rare instances in the United States.

Russia has placed large iron and steel orders in Germany.

Man Is Poor Faster

Animals Can Go Much Longer Without Food Or Water

When it comes to fasting, man is a poor second in comparison with the ability of various animals to go for long periods without food. Human beings can go for ten or twelve days without food or water and for weeks if they take water, but animals can do much better than this, according to Professor Hartkopf, a German scientist.

"Man, under the somewhat enervating influence of civilization," says Professor Hartkopf, "has undoubtedly lost much of his physical endurance. By comparison with the inferior organisms, he emerges only moderately well from this form of competition."

"The Rhenish salmon, during the long period of some nine months which it spends for spawning purposes in fresh water, takes no nourishment whatever. Astonishing as this record may seem, it is surpassed by that of many reptiles, which fast for a whole year when compelled by circumstances, and emerge in fairly good condition from the experience."

"Boasts of prey, including birds, in the vicissitudes to which they are liable where the food supply is concerned, show a wonderful capacity to adjust themselves to unfavorable circumstances and readily endure fasts of two weeks and longer."

"All these records are surpassed by those of fishes, turtles, salamanders, snakes and the like."

"Many small animals, like squirrels, survive no longer than the fourth day of a fast."

"However, the winter sleep of the hedgehog, and its fat, will last from three to four months while a variety of woodchuck fasts for more than four months without any kind of nourishment."

The Jig-Saw Puzzle

Demand In The United States Still Ahead Of Supply

American buyers of jig-saw puzzles to the amount of \$10,000,000 in 1932, an increase of 70 per cent. over 1931. More than 2,000,000 persons purchased interlocking jig-saw puzzles that require real skill. More than 15,000,000 solved the simpler cut-out puzzles, stamped, not sawed, in the puzzle craze has given employment to more than 20,000.

The enthusiasm for home entertainment has been reflected in a 20 to 50 per cent. increase in sales of all parlor games, tops, horse race bets, roulette, table tennis, bee bees and dart games.

Although several hundred manufacturers have entered the cut-out puzzle field in the last few months, demand is still ahead of the market. The release of the cheaper puzzles has created a vast new army of puzzle addicts who graduate to more difficult varieties. Manufacturers estimate that the jig-saw puzzles have been increased 30 per cent. in intricacy to meet the new vogue. Some puzzles have as many as 1,800 pieces.

Old fashioned designs featuring Colonial costumes and hunting scenes, copies of famous paintings, etc., still are the most popular, although there is a vogue for comics.

Orient Buying Wheat

Shipments From Canada This Season Total 8,814,011 Bushels

Steadily increasing demand in the Orient for wheat is instanced by the fact that Canada has shipped 8,814,011 bushels to China and Japan so far this season. This is 877,413 bushels greater than consignments at this time last year, and it is believed final figures will exceed last year's mark by more than a million bushels.

Bookings up to the end of March for the Orient are 366,666 bushels. Only the lower grades are wanted, and Australia, near at hand, has been getting the lion's share of the business.

A three-day census shows 4,000 homeless men, women and children in Cleveland.

World Trade Of Britain Continues To Expand, Despite Existing Conditions

Undeterred by adverse world conditions and by the prolonged period of difficulty through which it has passed, industrial Britain goes steadily ahead receiving and filling orders for foreign account, often in the face of severe competition from other nations, and thus continuing to build up Britain's reputation as a centre for the production of superior manufactured articles in widespread demand.

Of decided interest to Canadians is the announcement made by representatives of the Welsh tinplate trade of a record order from the American Can Company, operating works in Montreal and Vancouver, for a million boxes of tinplate valued at \$700,000. The firm receiving this order controls 20 tinplate works in South Wales, in addition to six iron and steel plants, and already the effects of the contract are being reflected in increased activity in local industrial circles.

A Manchester plant has recently completed a contract for eight heavy mixed-traffic locomotives for service on the Chinese Government Railways and the locomotives, fully erected, have been shipped in a vessel specially equipped for such consignments. Locomotives of this description have been supplied to China by United States firms in the past.

Four oil-electric locomotives, the largest yet produced in Europe, are about to be shipped from the Armstrong, Whitworth works near Newcastle-on-Tyne to South America for use on the Buenos Aires Great Southern Railway.

Two engineering firms are reported to have jointly secured a contract for gasoline storage tanks which are to be erected at Haifa, Palestine, for the Iraq Petroleum Company. The contract, Industrial Britain reports, is worth \$150,000 and was secured in the face of world-wide competition.

From Durham county comes word of the receipt of orders from Czechoslovakia and Holland for coal-cleaning equipment representing a total value of more than \$40,000.

Orders from Persia for textile machinery to the value of \$40,000 have been received by Lancashire firms. These orders follow the announcement that the Shah of Persia has given instructions that the machinery for a number of spinning and weaving mills that are being established in that country must be ordered from Great Britain.

Another big contract has been placed by the Russian trade agency with a Manchester firm for a railway axle plant which is to be installed by the Soviet Government with an annual output of 270,000 axles. The same firm has recently completed a large Russian machine tools order, and the latest one was obtained in the face of severe competition from Germany.

A Bolton concern of machine-tool makers reports the successful conclusion of negotiations with Canadian buyers for various types of tools formerly purchased from the United States. The order, it is stated, runs into thousands of pounds in value.

Thus, in hard times as well as in good times, the British industrialist goes steadily forward capturing orders for the provision of machinery or other articles to foreign countries, notwithstanding severe competition from other nations. His business surmounts tariff and other barriers and the world continues to be his market. That he is enabled to receive his due share of foreign orders is principally due to the quality of his output, and it is universally recognized that British goods are satisfactory goods and in spite of great temptations, the British industrialist has consistently declined to put an inferior article on the market.

Those who are accustomed to argue that Britain is dead industrially and otherwise fail to take into account the energy with which the British manufacturer continues to seek an outlet for his goods and the market which those goods come to command, on account of their inherent quality, in spite of world conditions in world trade.

Rice Growers Face Ruin

Empire Agreements Have Destroyed Trade For British Guiana

About 150,000 of the inhabitants of British Guiana are faced with ruin as a result of the Empire trade agreements reached at Ottawa, according to advice received at Port of Spain, Trinidad, giving the views of the Demerara Rice Marketing Board. Guiana formerly had a preference for its rice in the British market, but under the Ottawa agreements India gets the same rates and has been driving out Guiana rice. An appeal has been made to London for protection of the former market, but the authorities have been informed that no discrimination can be made. About half the population of Guiana is dependent on rice growing.

Tobacco exported from Cuba in a recent month was valued at \$1,139,637.

Taking Every Precaution

New French Liner Has Latest Apparatus For Safety

The builders of the new French liner "Normandie," the largest ship launched by any country in 1935, are taking special care to avoid any difficulty when the ship enters the transatlantic service in 1936. Reports from St. Nazaire, where the ship is under construction, describe the elaborate apparatus that has been prepared to provide perfect control at all times. The hull of the ship will be divided into eleven water-tight bulkheads parallel to the ship's sides, forming a double shell over the engine and boiler rooms. The hull is again divided by eleven decks and ballast tanks which extend over the entire length of the ship are sub-divided into forty-two compartments by water and oil-tight bulkheads.

The latest apparatus for safety in navigation, both at sea and in docking the ship, will be installed. A gyroscopic compass will be fitted with a route and rudder angle indicator which will serve as far as possible to repeat stations at various parts of the ship. In this way the course of the ship may be observed instantly by the officers concerned with that detail.

A high-tensile steel has been used in building the hull, to reduce its weight as far as possible. This steel has a breaking strain of forty tons per square inch as against thirty tons of the ordinary ship steel.

A committee of prominent French architects is in charge of the layout of the ship's interior. Their plans provide for a large central hall, the nucleus of the public rooms, the promenade deck being reserved almost exclusively to public saloons, including a winter garden, reading room, children's playroom, and a theatre equipped for the showing of talking pictures.

Rapid Growth Of Insanity

Psychology Professor Claims Canada and U.S. Lead World

Canada and the United States in equal per capita, are leading the world in numbers of insane, according to Very Rev. Canon Charles Vanhejen, professor of psychology and psychiatry at the State University of Amsterdam, Holland, who sailed from Saint John after completing an independent study of psychiatric cases in North America, during which he was attached to the Church of Our Lady of Victory in Saskatoon for two months.

"The rapid growth of insanity is due to a large extent from the depression with its resultant financial worries and the consequent mental alienation. 'The fast life of this country and the United States is also one of the main causes. Young girls are not heeding the demands of health. They stay up late at night. Get little sleep and rush off to the office for breakfast. It just can't be done.'

Not Good Advertiser

John Bull Does Not Go In For Lavish Display

John Bull can't advertise. Not 'art' 't' count! A recent issue of the New York Times carried a two-column advertisement of the annual general meeting of the shareholders of the National Provincial Bank of London during January. Under the bland disguise of a speech submitted to the Bank's balance sheet, Sir Harry Gordon, Bart., K.B.E., planted a few facts for American consumption which would not have looked so innocent had they appeared as an orthodox display or an interview. Sir Harry discoursed about the gold standard, Landon Conference, war debts, shipping subsidies, and a few other things; and discoursed in that nice suave way so many Americans enjoy. On the financial page, and in the staid dress which distinguishes such reports the world over, the pronouncement must have secured attention. It aroused interest—Marketing, Toronto.

The new office girl approached the boss timidly.

"Well, well," he snapped. "What is it?"

"There's a man waiting outside with a mustache," she faltered.

"Tell him I've got a mustache! There's no use of his waiting!"

"Here I sit, scared to death, and too darn lazy to run."—The Passing Show, London.

Need Paid Hunters

To Protect Game In Northern Manitoba From Timber Wolves

With timber wolves increasing in numbers and few pelts being brought into The Pas for bounties, northern Manitobans say that the only way to save the game in the Moose Lake country, will be by means of at least two paid hunters. It is learned at The Pas, Manitoba, that only 45 timber wolf pelts were brought there for bounty last year. This does not represent the total number killed, of course, as some pelts go right through to the cities. But the number of wolves killed was small in proportion to the wolf population.

Tom Lamb, Moose Lake trader, has found a number of deer cut down by wolves and left to rot. On a recent trip, he found a beautiful animal that had been killed by wolves. It had been chewed slightly at the throat. Lamb marked the spot intending to bring the deer to The Pas, where he intended to place it on exhibition. On returning a couple of days later, he found the passing Indians had taken part of it for dog feed.

Bring Low Prices

Portraits Of Earl Of Egmont's Family Are Auctioned In London, England

Nearly 50 of the Alberta rancher Earl of Egmont's family portraits were sold recently at Christie's famous auction parlors in London, England.

Two years ago when some of the old man's belongings to the estate were sold, a Reynolds' portrait alone fetched 3,000 guineas (about \$15,000 at par). Today 50 portraits realized a total of little more than a tenth of that sum.

Such a low price for forgotten portraits as Lely, Kneller, Hudson, Hobday and Joseph were put on one lot, bringing about a pound each. Four portraits by Slater, including one of Spencer Perceval, the murdered premier, brought only 12 guineas. Others followed at an average price of 12 guineas a dozen.

Returns Interest

Woman Refuses To Accept Interest On Government Bonds

If all holders of Canadian government bonds were of the same disposition as Mrs. J. J. Richardson of St. Catharines, Ont., the lot of the minister of finance would be much happier. Mrs. Richardson, in a letter dated February 23, not only announced her refusal to accept any interest on her government bonds, but returned to the department \$22.50, being the amount she received over a period of 15 years on a 5½ per cent. Victory bond which was redeemed in 1932, for the face value, \$100.

"It is against my sense of justice to use money to make money, or to charge money for money loaned to any person," Mrs. Richardson wrote.

Could Say Plenty

"Did you ever have the telephone ring when you were in the bathtub and there was nobody at home?" "Oh, yes," replied the family man. "What did you do?"

"Well, I play a little golf, and I have also made a few remarks to a flat tire, so draw your own conclusions."

It is reported that five times more records have been established in swimming during the last 10 years than in any other sport.

ROYAL COMMISSION TO ENQUIRE INTO NEWFOUNDLAND'S FUTURE

Above are the three members of the Royal Commission appointed to report on the economic situation in Britain's oldest colony, Newfoundland. Left to right, Hon. C. A. Magrath, Canada, Lord Amulree, Great Britain, and Sir William Stavert, Canada.

Celestial Phenomena Will Present Many Points Of Interest To Star Gazers This Year

A Wesley Letter

Great Preacher Gave Counsel On The Subject Of Marriage

A letter from John Wesley to a correspondent who had apparently asked the great preacher for counsel on the subject of marriage was sold at Sotheby's in London, England, for \$120.

The letter is addressed to "Mr. Peter Garforth, at Skipton-in-Craven, Yorkshire," and its contents are as follows:

"My dear brother: A person with all the qualifications you mention is not every day to be met with. I do not recollect seeing one at present. If I meet with or think of one I will send you word. I advise you not by any means to entangle yourself with a predestinarian. A sensible, well-tempered woman, fearing God though not much awakened, is preferable. Wishing you may have light from God in that and all things, I am, your affectionate brother, J. Wesley."

Encouraged Flower Farming

Prince Of Wales Helped Miners In Duchy Of Cornwall

The Prince of Wales has been obliged to cancel his proposed visit to the Isles of Scilly. Had he been able to keep the engagement his arrival in the Isles would have been chronicled with the height of the flower season, and he would have seen the great strides made by those engaged in the bulb industry. The output is greater than ever before. Consignments for market number as many as 5,000 boxes of flowers a day.

At the time when the distress among unemployed miners in the Duchy of Cornwall was at its worst, and alternative employment was being sought, the Prince showed practical interest in their predicament by placing at the disposal of several families holdings in the Duchy and by supplying the necessary implements and bulbs to enable them to take up flower farming.

A Custom Of The Sea

British Ships Blow Whistle When Passing Island Near Queensland

Whenever a British ship steaming along the coast of Queensland passes between a certain island and the mainland, she blows a prolonged blast on her siren. The story begins years ago, when a young Englishman engaged on exploration work in that locality had a narrow escape from losing his life. He was rescued just in the nick of time by a native girl, who, to save his life, had to swim with him across half a mile of shark-infested water. The young man married the girl, and they settled on the island. There, one night, a British vessel was wrecked there, and it was only through heroic efforts by the man that all lives were not lost. He has since died, but the wife and family still live upon the island, and it is to show them that the brave act is still remembered that every British ship sounds its whistle as it passes.

Street Purposes Have Changed

New Planning Necessary Opinion Of President Of British Architects

London hears a novel analysis of modern street traffic problems by Sir Raymond Unwin. The president of the Royal Institute of British Architects says street purposes have entirely changed. We run what are practically locomotives at locomotive speed on highways meant for horses and pedestrians. A complete new planning must come. It will expedite traffic through streets on which are no shops, and will assure safety of adults and children on foot. The pedestrian will move leisurely in parallel streets which will have shops but no motor traffic—Christian Science Monitor.

Taking Her Revenge

"James, my lad," said the grocer to his new assistant, "who bought the mousy cheese today?"

"Mrs. Brown, sir," was the youth's reply.

"And the stale loaf we could not sell last night?"

"Mrs. Brown, sir," was the youth's reply.

"Where's that lump of rancid butter that the baker refused?"

"Mrs. Brown bought it cheap, sir," was the answer.

"And the six eggs we could not sell a week since?"

"Mrs. Brown. Are you ill, sir?" asked the boy as the grocer turned green and groaned.

"No, no; only I'm going to tea at Mrs. Brown's tonight," replied the unhappy man as he wiped the perspiration from his face and sank into a chair.

Raising Status Of Iceman

Increased dignity for icemen in California has been decreed by some companies. They have declared that their employees must be called "ice attendants." They must dress in white uniforms with brass buttons and carry the ice in stout thick waterproof satchels.

The sky schedule for 1935 will be of great interest to star gazers, according to the American Nature Association.

Six periodic comets are due for return engagements. Two eclipses of the sun are on the schedule also.

Then too, Mars, which is probably of more popular interest than any other planet because of its possibilities as an abode of life and its fascinating and varied surface markings which indicate seasonal changes, came to perihelion on March 1.

Perihelion is that point of the orbit of a planet or comet which is nearest to the sun. This is one of the less favorable positions, since the planet is 62,700,000 miles distant from the earth at nearest approach on that date.

Nevertheless astronomers interested in the physical phenomena of the planets are keeping the little neighboring world under scrutiny for some weeks, and we may expect to hear more than usual about the ruddy planet Mars within the next few months.

The comets returning are Brown, Pons-Winnecke, De Vico-Staff, Giacobini, Finlay and Holmes. The first was last seen in 1870 and is due to come to perihelion again in November.

The Pons-Winnecke comet has a period of nearly six years and was discovered in 1810. It is due to return again in May.

Giacobini's comet was discovered by that astronomer at Nice in 1900. It is due to perihelion in June. Finlay's comet is also due in June.

Holmes' comet was discovered in 1892. It is due in August.

There will be two eclipses of the sun, both annular. An annular eclipse is one in which the relative positions of sun and moon are such that the moon falls completely to cover the solar disk and there is a thin annulus or ring of light surrounding the dark lunar disk at the time that would correspond to mid-totally of a solar eclipse.

The first eclipse occurred on Feb. 24. The partial phase was visible in the southern and central part of South America, all of Africa, except the extreme southwestern part, the western part of the Mediterranean, Greece, Asia Minor, Persia and Arabia.

The next eclipse will occur on Aug. 21. The partial phase will be visible in central and eastern Europe and northeastern Africa at sunrise, later in the morning, or near midday, in Siberia, central and southern Asia, and in the afternoon in the Philippines and East Indies.

Status Of The Metis

Government Spokesman Says Half-Breeds Not Wards Of Dominion

Half-breeds are not wards of the Dominion Government, said Hon. T. G. Murphy, head of the Department of Indian Affairs. Half-breeds were citizens of the provinces in which they live. He said with the same rights and responsibilities as the whites. Their care was a provincial matter.

In the Alberta House it was stated that half-breeds in that province were impoverished. Premier J. E. Brown said it had not been decided whether the Dominion or provincial administration was responsible for the care of the half-breeds. It might be necessary for the courts to decide.

The pure-bred Indians are wards of the Dominion Government. They have not the right of the white citizens. The Dominion Government is responsible that they do not suffer want.

May Sponsor Irish Show

Earl Of Beasborough Will Be Asked To Become Patron

His Excellency the Earl of Beasborough, Governor-General of Canada, is to be asked to become patron of Pitlow annual agricultural show, one of the most notable agricultural exhibitions in Southern Ireland. The Earl's demesne at Beasborough, near Kilkenny, Irish Free State, has been given by him every year for the given free by him every year for the holding of the exhibition. Pitlow show was inaugurated by the Earl's ancestors 105 years ago.

Hard On Bachelors

Bachelors are going to have to do their share in keeping New Zealand's financial balance on the right side of the ledger. What is the equivalent to a bachelor tax, estimated to produce \$25,000, is provided for in the annual taxing bill introduced in the New Zealand parliament.

Auto Exports Increase

Increased sale of Canadian automobiles abroad is the brightest spot noted in the February business summary issued by the Bank of Montreal. Greater sales were attained abroad throughout the whole of 1932 and January's figures reveal expansion of the foreign market is continuing.

More people would eat spinach if there were a law against it.

Spring Opening

Friday and Saturday, March 24th and 25th

Spring's Newest Fashions will be on Display
Coats Suits Dresses Millinery

The New Spring Coats \$21.00 and \$22.50

There is style, quality of fabric and skillful tailoring in these new coats for Spring. Novelty Tweeds and English Cloths in Greys, Fawns, Browns, Blues, etc. \$21.00 and \$22.50.

Novelty Tweed and Polo Cloth Coats

With new sleeves, collars and scarfs. A smart range for Women and Misses. Sizes 14 to 44.
\$8.95 and \$9.50

The New Dresses For Spring Wear

Pure silk, slash sleeves, ultra full sleeves, necklines are still high and feature Felix Bows. Colors: navy blue, matelot blue, cloudmist grey, muffin beige and of course black and white. Sizes for women and Misses.
\$8.95 to \$17.50

New Spring Hats \$1.75 to \$5.00

Close-fitting and brimmed styles of fine straws and novelty fabrics, etc. Their trimmings are small wings, flowers, ribbon, feather novelties and ornaments.

New Spring Scarfs with a Triple Claim To Fashion 95c.

The new scarfs have a triple claim to fashion this Spring. They will be worn with suits, with dresses and with sportswear.

Knit Suits Fashioned From Pure Wool

3-piece styles. Smart sport suits. Trim belted jacket with collar or flat necklines. Sleeveless pullover in contrasting tones. Sizes 34 to 44.
\$10.50 and \$22.50

W.M.S. Will Be Serving Tea At Our Opening
Friday and Saturday, March 24th and 25th
from 3 o'clock until 5 o'clock

Hardware Department

Something Wrong

Uncle Sam closes his banks for a week sets his printing presses to work printing millions upon millions of paper money and then when the banks reopen we find our "sound money." Canadian dollar quoted three cents lower than when the U.S. banks closed. Looks like a jolt in the ribs for our sound money friends who abhor the suggestion that money is printed on pieces of paper and who like to think there's something sacred about it.

EXCHANGE WHEAT FOR SEED

More than 66,000 bushels of registered seed grain, most of it wheat have been distributed among farmers in the province under the seed grain exchange policy inaugurated by Hon. George Hoadley, minister of agriculture. Under this plan it has been made possible for farmers to exchange commercial grain from their farms for seed grain on the basis of the premium of 3/4¢, one's a bushel for the seed over the current market price. Thus grain instead of cash is taken from the farmers for the seed. The distribution of the 66,000 bushels under this plan has been very widespread, covering 36 points from the south-eastern part of the province to Fulmer in the north. The grain distributed includes 47,000 bushels of seed wheat, 17,000 bushels of seed oats and about 2,000 bushels of seed barley. It is expected that some 15,000 bushels more of oats will be distributed.

MUCH DISTRESS IN WEST COUNTRY

Rimby—H. G. Young of Millott district, U.F.A. organizer, and H. G. Laycock of Ponoka are holding a series of meetings west of this line of railroad from Winfield south, taking in many points in the far western part of the constituency. Alder Plats, 26 miles west of Winfield and six miles east of the Saskatchewan river being the most westerly point. They report good attendance at all meetings and much interest. They found much distress among the newer settlers in the western part of the district.

UNEMPLOYED ON FARMS

An extension to April 15 of the arrangements for placing of single unemployed on farms is announced by A. A. Mackenzie, chairman of the Alberta Relief Commission. Should the spring prove a late one, a further extension may be granted, provided the arrangements does not give signs of interfering with the normal absorption of labor for spring farm work. Already nearly 1,200 single unemployed men have been placed on farms under the relief commission arrangement, at different parts of the province.

Perfect Ingredients and perfect care in brewing contribute to the excellence of Alberta beers.

AT THE AVALON

Friday and Saturday

"Heritage of the Desert," Zane Grey's action romance of the West will be here Friday and Saturday. The large cast appearing in the production is headed by Randolph Scott, Sally Eane, and J. Farrell MacDonald. The story is set on the ranch owned by MacDonald, an old patriarch who rules with kindly hand. David Landau, head of a gang of outlaws, has his eye on the ranch and on Miss Blane, daughter of MacDonald's dead partner. His son, he plans, will marry her. Meanwhile Scott, a young survivor, arrives to check the boundaries of MacDonald's ranch. He discovers that Landau and MacDonald's son have had dealings—the latter, a weak character, is in debt to outlaw. Scott falls in love with the girl, and she reciprocates. When the MacDonald-Landau feud comes to a head with the slaying of MacDonald's son, Scott distinguishes himself so thoroughly that he wins a permanent place in MacDonald's heart—and in Blane's too.

Coming "Over the Hill," featuring James Dunn, Sally Eilers, Mar. vi and April 1.
"Trouble in Paradise" featuring Marion Hopkins, H. Marshall, Kay Francis, April 14 and 15.
Show starts Friday 8:30; Saturday at 7:30 and 9:00.
